

File Explorer

License: Apache License v2
Last version: 1.0.0
Author: Manfred Lenz (IBM)

The File Explorer is a sidebar plugin to explore files in the OS file system.
The plugin supports Drag&Drop of files from/to Notes.
You can open, delete and rename files. A simple favorite function is implemented.
Adds a preference page to select the drives and some other preferences.

Supported OS: Windows and Linux.
Supported Languages: English and German
