# **DominolQ Insights**

Simple DominolQ Functionality for your Existing  
HCL Domino Apps

# About Your Presenter

**Brian Arnold – Technical Advisor**

Brian.Arnold@hcl-software.com

- Started designing in Lotus Notes V3.36
- Worked for / owned various Business Partner organizations over the past 31+ years
- Have designed / developed many repeatable Domino-based solutions
  - Business Continuity / DR Planning
  - Sales Force Automation
  - Field Support
  - Contact Relationship Management
- For the past 6 years at HCL Software, I design the demonstration applications for our product launches and assist customers in understanding their investment

# DominolQ - The Challenge

We want to use DominolQ, but ...

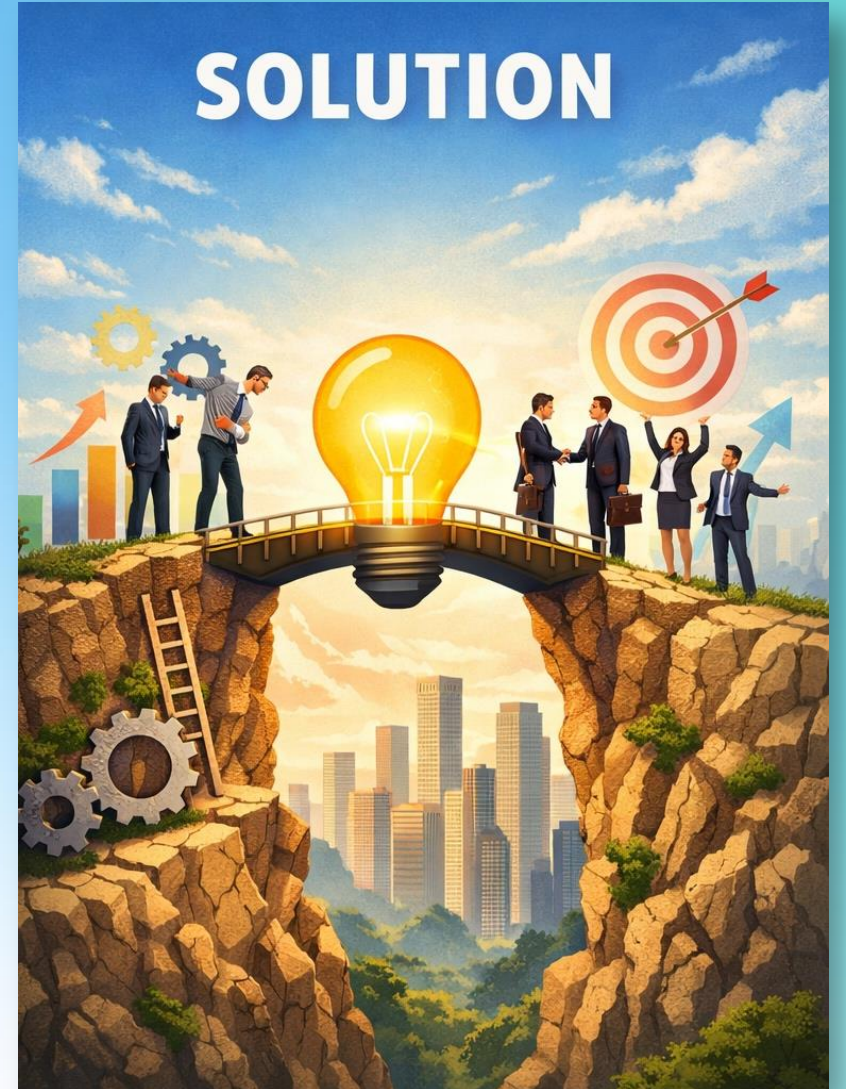

- AI initiatives stall due to complexity in legacy Domino apps
- Heavy reliance on specialized Domino development skills
- Slow and costly rollout across applications
- Infrastructure overhead increases risk
- Delayed ROI and limited business impact

# DominolQ Insights - The Solution

With DominolQ Insights you get ...

- No-code AI enablement
- Works across ALL Domino apps
- Minimal infrastructure impact
- Guided UX drives adoption
- Accelerates time-to-value
- Domino 2026 allows use of DominolQ without a GPU

# DominolQ Insights - Business Impact

Using DominolQ Insights provides ...

- Faster ROI
- Reduced costs
- Usable AI on Day 1
- Improved productivity
- Better decisions
